RHEINZINK-Shiplap Panel

Due to its layered characteristics and shadow less joints, the shiplap panel is a unique cladding, reminiscent of wooden façades. When exposed to light and shade, sharp contours appear because of its profile geometry. Contrary to the horizontal and vertical reveal panels, this system does not have any reveals. Precision manufacturing (in accordance with detailed planning and pre-defined panel dimensions) guarantees efficient and optimum installation on site.

- Layered panel look
- Horizontal installation
- Scalloped design
